

Scanning for Viruses using Symantec AntiVirus Program

Even though the Symantec program does real time scanning for viruses it is a good idea to scan your computer for viruses on a regular basis. Here are the steps for scanning for viruses using your Symantec Antivirus program.

1. On the task bar on the right bottom of your desktop right mouse click on the gold shield and select **Open Symantec AntiVirus**.

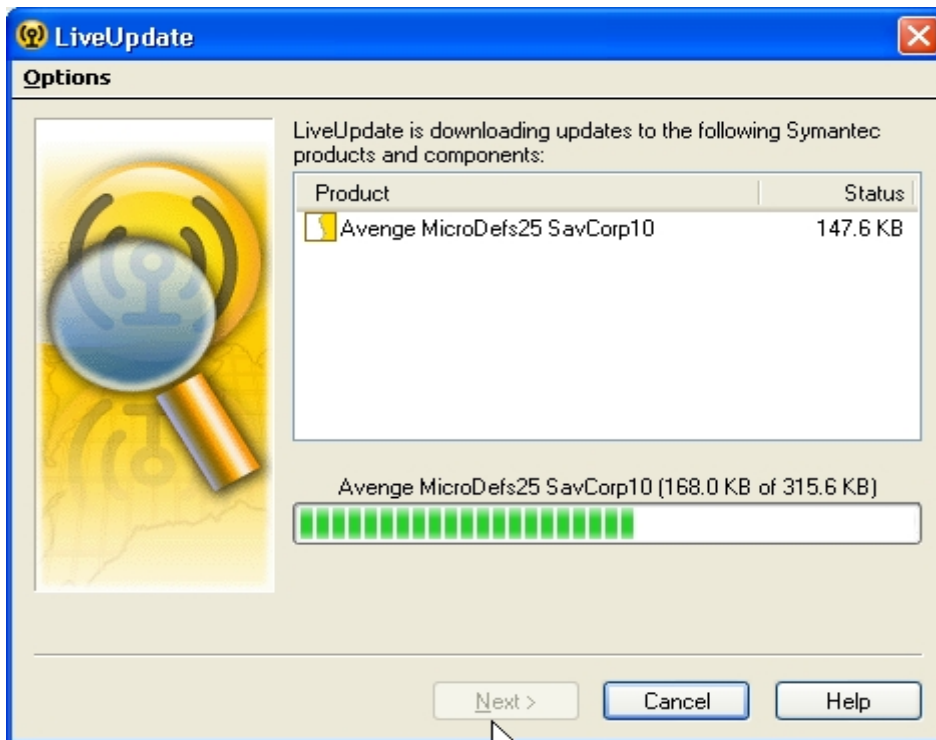

2. Select the **Live Update** button.

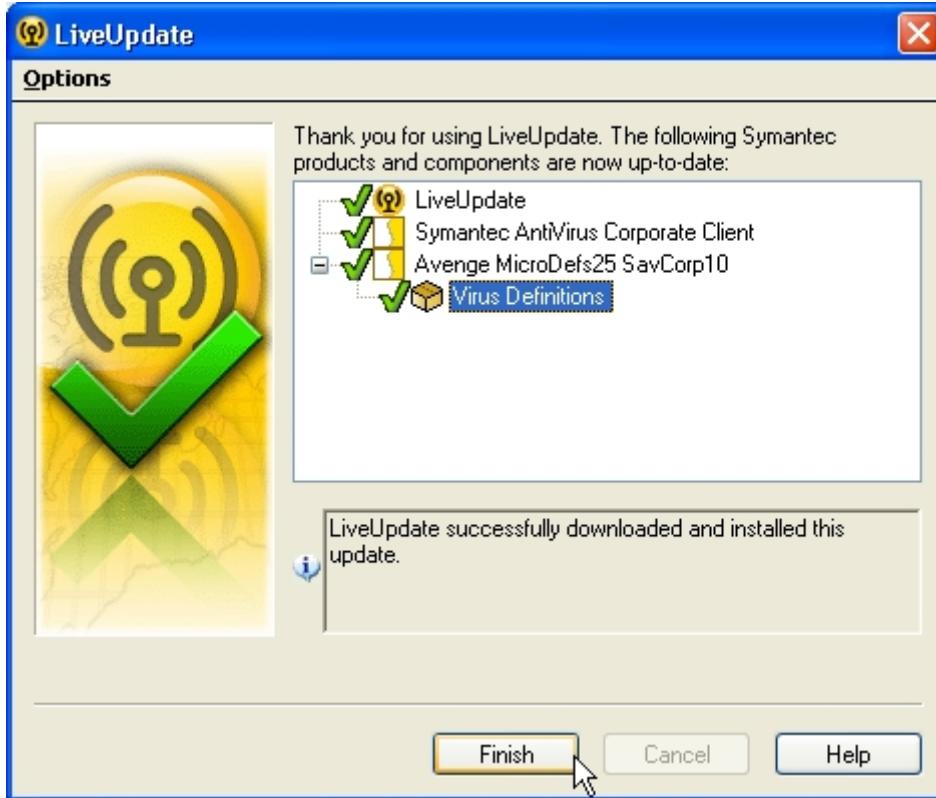

3. Select the **Next** button on the Welcome to Live Update screen.

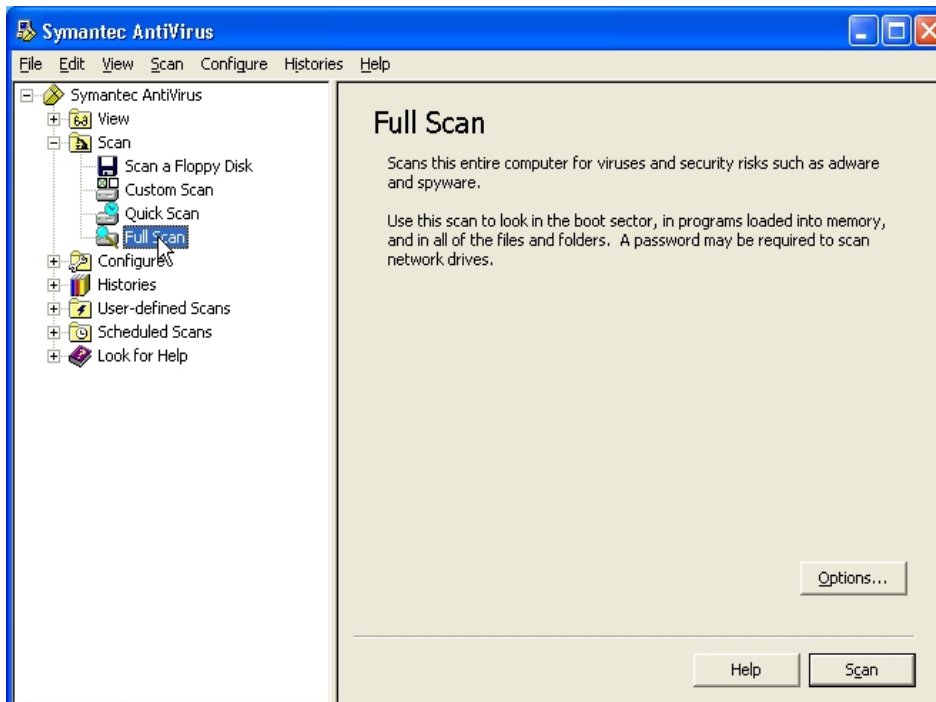

4. Updates will begin to download.

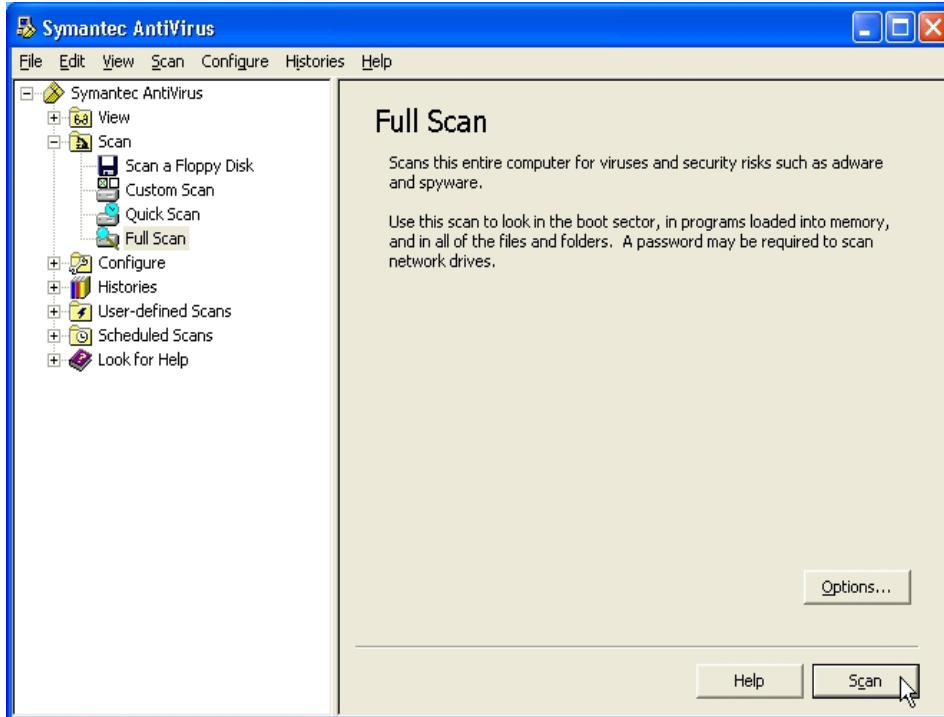

5. Once update is downloaded select **Finish**.

6. From the Menu on the left side select **Full Scan**.

7. Click on the **Scan** button.

8. Symantec will begin scanning your system.
