FREE to students and community members of all ages.

Plastic in the Global Ocean

Saturday, October 25, 2014 at 7:00 pm

Dr. Giora Proskurowski
University of Washington

Dr. Proskurowski earned his BS from Amherst and MS & PhD degrees from University of Washington. He has worked as a scientist and educator at Woods Hole Oceanographic Institution, Sea Education Association, and is currently at the University of Washington School of Oceanography. His research efforts are split between open-ocean plastics, deep-sea vents, and building a fiber-optic cabled observatory in the northeast Pacific. Giora has spent more than one year of his life in the middle of the ocean, five days of his life on the seafloor, and several months in the centers of the gyres in the North Atlantic and North Pacific.

Join us in the lobby starting at 6:00 pm with local non-profit groups: Washed Ashore, Surfriders, Friends of South Slough and Coos Watershed Association. They will also be available for discussion following the talk.

LECTURE SERIES SPONSORS:

Southwestern Oregon Community College Foundation
Southwestern Oregon Community College Geology Club
