Downloading and Installing AVG AntiVirus

1) Start by opening up a web browser and go to http://www.avg.com/en-us/homepage.

2) Once the page loads, click the AVG AntiVirus FREE 2015 button in the middle of the page.

3) Here, click on the FREE Download button. This will take you to another website.
4) Next, click on **Download Now**.
5) Depending on your browser and its settings, your download may begin at this point, you may need to choose where to save the file, or you may choose to just run it as soon as the download is complete. When the file has completed downloading, double-click it to begin the installation.
6) You may get a pop up verifying that you are wanting to install a program. Click Yes to continue. If you did not receive a pop up at this point, go to the next step.

7) Click Next >.
8) Read through the End User Software License Agreement, and if you agree to the terms of the program, click Accept.

9) Select the Basic protection option, then click Next. 
10) Click Next >.

11) Click Next >.
12) The installer will now begin downloading any updates it can if you are connected to the internet. After downloading updates it will then continue and install the program and any updates it found.

13) Your computer will need to be restarted for the installation to complete fully. Click Restart Now (recommended) to restart your PC.
14) After your computer restarts, AVG should open automatically and begin checking for further updates.
If AVG does not open automatically, you may need to open it by clicking the Start Button icon in the lower left of your screen, clicking on All Programs, then clicking the AVG folder, and finally by clicking AVG 2015.
If you want to manually check for updates to AVG AntiVirus

Note: You must be connected to the internet to update the program!

1) With the AVG program open, click the **Update now** button to download the latest updates for the program.

2) The button will change to **Updating**... while the update process takes place in the background.
3) When the update process is complete, the button will change again to Protection is up-to-date and your screen should look similar to the one below.
Running a scan with AVG AntiVirus

1) First, click on your **Start Menu button** in the bottom left of your screen, then click on **All Programs** at the bottom of the menu that comes up, then click the **AVG** folder, and finally click **AVG 2015**.
2) Click the **Scan now** button to begin the scanning process.

The image below shows a scan in progress.
