Procedure for Logging on to SOCC wireless network with Windows 8

1) There are two ways to access your network settings. In the bottom right corner of your desktop in the Task Bar will be the wireless network icon. **Click** on it to open the list of available networks.

2) Select the **Student network** from the list of networks on the right.
3) Then click **Connect**.

4) Once you are connected to the network, open your web browser. You should be redirected to the Authentication page. You will need to login with your Student ID number and either your 6 or 8 digit date of birth as your password.

5) At this point, if this is the first time connecting to the Student network, you’ll be asked to download and install Safe Connect (a program that verifies you have an up-to-date antivirus program on your computer). For the download and install steps, please see the **Installing the Safe Connect Policy Key** tutorial.
